

Presentation Prompter Summary

Description

Presentation Prompter turns your Mac into a teleprompter and helps you deliver successful presentations. It is built for live performers, speakers, newscasters, actors, narrators, and anyone who has ever used cue cards or read from a script.

Benefits

- A new prompting engine supports smooth scrolling on multiple screens.
- The script on the talent screen can be flipped for use in mirror enclosures.
- Teleprompter operators see exactly what the talent sees on their own screen, enabling better communication between the operator and talent.
- Accommodate any speaking rate or text size with precision speed controls using a keyboard, trackpad, or a dedicated remote.
- A focus arrow and margins minimize eye movement and help delivery.
- An on-screen clock and remaining time estimate help presenters stay within allotted times.
- The built-in editor supports any combination of fonts, colors, spacing, and images. Highlight speaker names, emphasize important words, and space lines to improve readability.
- Existing content in MS Word, RTF, or other common file formats can be imported.
- Bookmarks let users easily navigate large scripts and rehearse specific parts.

Availability

A free, feature-complete trial of Presentation Prompter can be downloaded directly from <http://presentationprompter.com/download>. Presentation Prompter is also available on the Mac App Store <http://presentationprompter.com/mac-app-store>. New licenses can be purchased for \$99 USD. Upgrade and volume discounts are also available.

Presentation Prompter requires OS X 10.6 or newer.
